

Really Good Student Bins Organizing Rack Assembly Instructions

Congratulations on your purchase of this **Really Good Student Bins Organizing Rack**. You will need a Phillips screwdriver if you choose to attach the optional hinges.

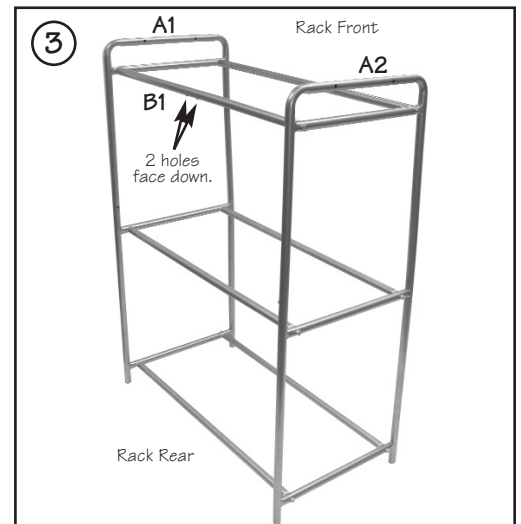

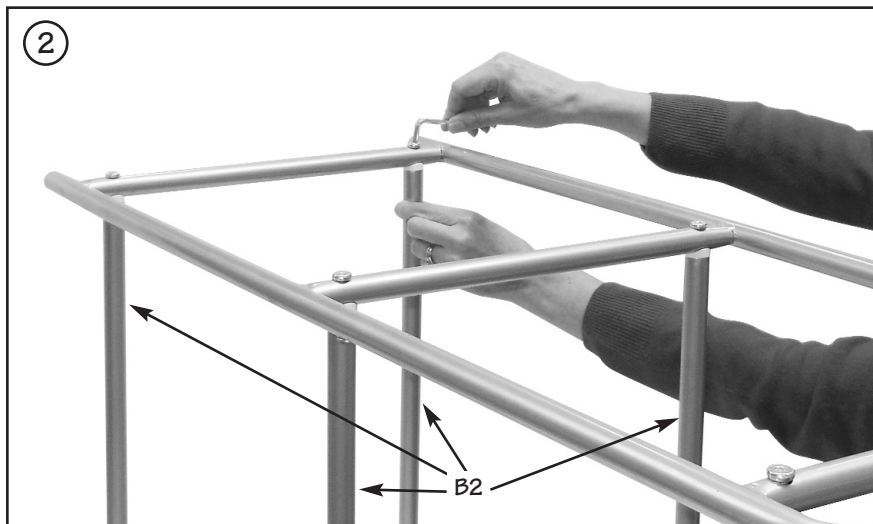

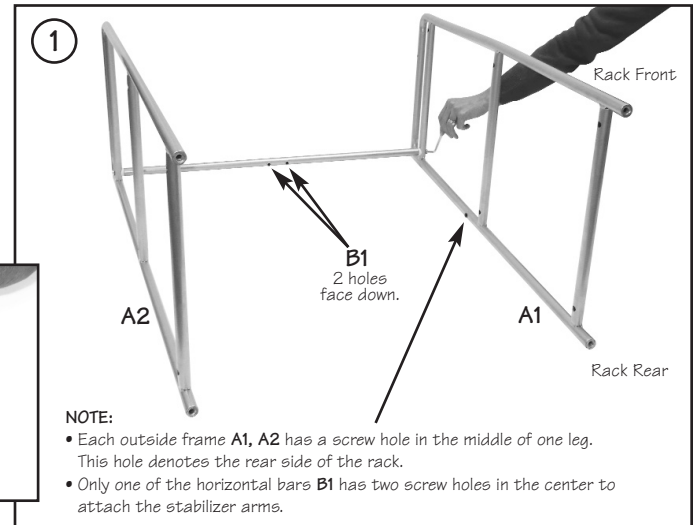

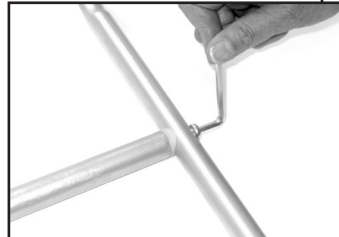

This Really Good Stuff® product includes:

- A1 – Right outside frame
- A2 – Left outside frame
- B1 – Horizontal bar with 2 holes in the center
- B2 – 5 Horizontal bars
- C1 – Right stabilizer arm
- C2 – Left stabilizer arm
- D – 12 Large screws
- E – 12 Curved plastic washers
- F – 4 Small screws
- G – 4 Rubber feet
- H – 4 Locking wheels
- I – 2 Hinges (optional)
- J – 1 Allen wrench

To assemble this Really Good Student Bins Organizing Rack:

1. Attach the horizontal bar **B1**, to the top rear of both outside frames **A1** and **A2** using large screws **D** and curved plastic washers **E**. The flat side of the plastic washer should go against the horizontal bar. Leave bolts loose so **B1** can be adjusted. Be sure that the screw holes in **B1** face downward.
2. Attach the remaining five horizontal bars **B2**.
3. Stand rack up.

Really Good Student Bins Organizing Rack Assembly Instructions

4. Screw the top of the stabilizer arm **C2** to the underside hole on the top rear horizontal bar **B1** using a small screw **F**.
5. Screw the bottom of the stabilizer arm **C2** to the left outside frame **A2** and tighten.
6. Repeat for the other stabilizer arm **C1**. You may have to lightly twist the rack in order to get the last screw through the stabilizer arm.
7. You may use either locking wheels **H** or rubber feet **G** on the bottom of the rack. Locking wheels screw into the bottom legs of the outside frames. Tighten wheels with pliers if needed. Rubber feet screw into bottom legs.
8. If using optional hinges **I** to join two racks together, place two hinge halves around frame and screw together as shown. Repeat with second hinge.
