

Tap & Write

Blends and Digraphs

Set of 120 Cards

Instructions

This **Tap & Write Blends and Digraphs** activity includes three differentiated card sets: teal, pink, and blue. Students have fun naming the picture, tapping out the sounds in the word, writing in the missing letters that they hear, and lastly, reading the whole consonant blend or digraph word. **Please note:** The consonant digraphs (th, sh, ck, ch, wh) have one dot below them to signify that they make one sound together when tapping out a word. You will also notice that all of the consonant blends have two dots below them to signify the two sounds they make when tapping out a word.

Step 1:

Decide which set of cards you want your student(s) to work on. The sets increase in difficulty based on the missing letters.

Teal Set = Blend and digraph words with 1 vowel and 1 consonant missing*

Pink Set = Blend and digraph words with the blend or digraph missing*

Blue Set = Blend and digraph words with all of the letters missing*

*Missing blends and digraphs in all word sets rotate between the initial and final positions to ensure well-rounded practice.

Step 2: Decide if you want multiple students or a single student to work on this activity. Provide your student(s) with desired cards and a dry erase marker to complete this activity.

For multiple student use:

Remove your desired cards from the ring and place in a basket at the center of their work area. Students reach in and pull out a Tap & Write Blends and Digraphs card to work on. Students keep working in this fashion.

For single student use:

Cards can stay on the ring. Let students flip through and complete independently.

Enjoy!
