Suggestions for Use:

Use these Blends and Digraphs Stacking Tiles for a variety of different hands-on learning activities. There are 100 lowercase letter tiles included. The tiles are color-coded for easy letter identification and word building practice with two colors: **blue for consonants**, **blue for blends and digraphs**, and **red for vowels**. Most importantly, these tiles STACK! Students will love watching their progress as they stack and build their way through different activities.

Practice Letter Identification

Have students sort and stack letter tiles to build their letter identification skills. Students can sort by using letters that are in their name/not in their name; letters with straight lines, curved lines, or both; or even stack matching letters.

Practice Word Building

Have students build and stack common CVC words or blends and digraphs words. Students can add one tile at a time to change one sound at a time. Each time a new word is built, have students read it aloud.
